Cloud Transformation Start

Cloud Transformation Start is a consultative workshop that helps customers get started with Google Cloud Platform (GCP). Computas will facilitate an interactive session where customers can explore GCP functionality, scenarios, and capabilities through what-if discussions and white boarding.

With Cloud Transformation Start, customers will gain a better understanding of what a Cloud solution will involve, and have the confidence to decide on moving forward with a formal Cloud assessment, typically a Cloud Transformation Plan.

Key Activities

Note
In order for customers to actively participate in design and white board sessions, the customer must prepare some answers to the questionnaire that has been sent before the session.

Design and Architecture White Board Session
Review and discuss relevant architetures and use cases that can comprise a solution applicable to the organization. Take into consideration common and best practices and typical pitfalls to avoid.

Explore Solution Feasibility
Leveraging demos, if time permits, run through various scenarios to visualize how relevant capabilities in GCP can be used to address the customers business and technical requirements.

Insights and Next Steps
Help the customer plan for Cloud project by summarizing key insights, dependencies, and lessons learned. Identify open questions, action items, and recommended next steps.

Deliverables
- Design and architecture white board recommendations
- Executive Cloud Start report with insights and recommende next steps

Available Product Areas
- Infrastructure

Scope and pricing
- Up to two days on-site engagement within a one week period
- Includes off-site pre- and post-engagement prep and follow-up work
- Maximum of 5 participants

  Pricing will be agreed upon by customer and Computas
